About Us – Greatcare

Creating a Better Care

Greatcare is a professional medical device company with more than 20 years of experience in product development, manufacturing, and global supply. We are committed to providing safe, reliable, and affordable healthcare solutions that serve hospitals, clinics, and home care needs around the world.

Our Mission

At Greatcare, we believe that better care begins with better products. Through continuous improvement and strong partnerships with healthcare professionals, we aim to deliver innovative and user-friendly medical devices that make daily care easier and more effective.

Our Product Range

Greatcare provides a comprehensive range of medical products covering:

- **Enteral Feeding Systems** – Feeding sets, syringes, and accessories for clinical and home nutrition.
- **Urology & Incontinence Care** – Foley catheters, urine bags, and related components.
- **Respiratory & Anaesthesia Products** – Breathing circuits and airway management items.
- **Wound, Drainage & Surgical Care** – Wound dressings, suction sets, and surgical consumables.
- **Medical Dressing & General Care** – Gauze, bandages, and disposable items for everyday hospital use.

Beyond these core areas, Greatcare also offers an extensive portfolio of general hospital and healthcare products, supporting a wide range of clinical and home applications.

This catalogue represents only a part of our continuously expanding product range designed to meet the diverse needs of modern healthcare.

Our Commitment

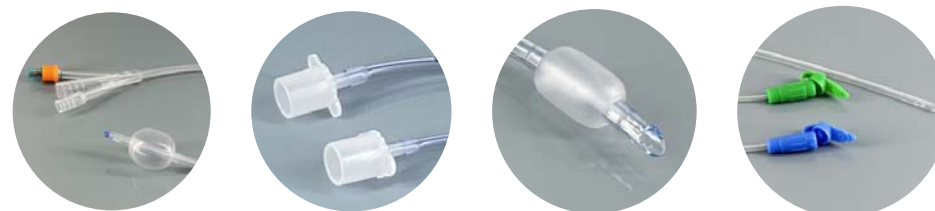

We understand that every healthcare institution has different needs. Greatcare works closely with distributors and healthcare providers to offer customized product combinations and OEM / ODM services that meet specific market requirements.

Our experience, reliability, and long-term focus on quality have made Greatcare a trusted partner for customers in many countries and regions.

Our Vision

To be a global healthcare partner recognized for quality, trust, and innovation — helping people everywhere create a better care.

Endotracheal Tube, Cuffed

Manufactured with strong tube walls to ensure the proper ventilation for all patients. A variety of sizes ensures a safe airway is maintained throughout the surgery.

- High-volume, low-pressure, barrel-shaped cuffs.
- Responsive pilot balloon.
- Finely heat-welded cuffs.
- Split-resistant radiopaque lines.
- Smooth Murphy eyes.
- Kink-resistant thermosensitive tube.

Endotracheal Tube (Taper Type)

An endotracheal tube (taper type) is used in general anaesthesia, intensive care and emergency medicine for airway management and mechanical ventilation.

The tube is inserted into a patient's trachea through the patient's nose or mouth in order to ensure that the airway is not closed off and that air is able to reach the lungs. The endotracheal tube is regarded as the most reliable available method for protecting a patient's airway.

The endotracheal tube is made from PVC in medical grade, consists of tube, taper cuff, inflation line, valve, pilot balloon, and connector.

- Thermosensitive PVC allows the tube to soften at body temperature for greater patient comfort.
- Softer rounded Murphy eye is less invasive.
- Atraumatic soft rounded beveled tip.
- The tapered cuff, which gradually narrows at the distal end, can reduce airway resistance and protect the tracheal mucosa.
- Accurate depth marks.

Oral Suction Tube

The Oral Suction Tube is mainly used for sputum suction and oral care in patients with coma, long-term bed rest, mechanical ventilation, fasting, and inability to eat by mouth. It is also suitable for ice stimulation and tactile stimulation in patients who need swallowing and speech training in the rehabilitation department.

- Reduce the incidence of oral and pulmonary infections and avoid the occurrence of inhalation pneumonia.
- Reduce nurses' workload and nursing cost.
- The head is made of a softer material that does not damage the patient's mucous membranes during oral care.

ORAL SUCTION TUBE

Ref. No.:	Specification:
GCR1028991	Adult
GCR1028992	Children

Suction-Plus Tracheostomy Tube

Use for continuous suction of subglottic secretions, reducing the clinical effect of exogenous infection and sedimentary incidence of pneumonia.

Tracheostomy Tube, Cuffed

- Designed to establish and maintain an airway in seconds in emergency situation.
- Made of non-toxic, clear, kink-resistant PVC material to protect delicate mucosal tissue.
- Full-length Radio-opaque line aids the assessment of exact location of the tube.
- Soft, thin-walled cuff ensures effective sealing and atraumatic intubation and extubation.
- Rounded and smooth tip of the obturator minimizes tissue drag during intubation.
- One-way valve can be efficient and easy for cuff inflation and deflation.

OXYGEN TUBING (KINK-FREE)

Ref. No.:	Size:	Color:	Qty/Cs:
GCR102007	7FT	Green	100
GCR102024	14FT	Green	50
GCR102025	25FT	Green	27
GCR102050	50FT	Green	14

Suction Catheter

- Made of non-toxic PVC.
 - Atraumatic, soft and rounded open tip with two lateral eyes.
 - Soft and kink resistant PVC tubing.
 - Colour coded connector for easy identification of size.
 - Extra smooth low friction surface tubing facilitates easy intubation.
 - With X-ray or without X-ray.
 - An option of transparent or frosted tubing.
- Size: 5, 6, 8, 10, 12, 14, 16, 18, 20, 22, 24Fr/Ch.

SUCTION CATHETER

Item No.:	Description:
GCR1021	With Control Valve Connector
GCR1022	With Y Connector
GCR1023	With Pipe Connector
GCR1024	With Straight Connector
GCR1025	With Funnel Connector (A/B)

Vertical Strips Suction Catheter

- Six kinds of connector available.
- Color coded for size identification.
- Vertical strips on the surface will avoid sticking to the wall of the tube, which will solve the suction problem completely.

Size: 6, 8, 10, 12, 14, 16, 18, 20Fr/Ch.

VERTICAL STRIPS SUCTION CATHETER

Item No.:	Description:
GCR1021	With Control Valve Connector
GCR1022	With Y Connector
GCR1023	With Pipe Connector
GCR1024	With Straight Connector
GCR1025	With Funnel Connector (A/B)

Suction Catheter Kit

- Six kinds of connector available.
 - Color coded for size identification.
- Size: 6, 8, 10, 12, 14, 16, 18, 20 Fr/Ch.

SUCTION CATHETER KIT

Item No.:	Description:
GCR1026	with PE gloves

Closed Suction Catheter

- The film sheath design of the closed suction catheter is effective to prevent the infection of respiratory tract diseases and the rate of nosocomial cross infection in the process of medical treatment.
- Breathing while suctioning to maintain oxygen saturation of the patient.
- Size: 6, 8, 10, 12, 14, 16 Fr/Ch.

CLOSED SUCTION CATHETER

Item No.:	Description:
GCR1026	24hours
GCR1026	72hours

Infant Mucus Extractor

(With Funnel connector)

- Suitable for obtaining mucus specimen for microbiological examination.
- Also suitable for aspiration of secretion from Oropharynx of new born babies to ensure free respiration.
- An option of transparent or frosted tubing.
- Atraumatic, soft and rounded, open tip with two lateral eyes.
- Clear transparent container permits visual examination of aspirate.
- Spare screw top lid is provided to seal the container for safe transport of specimen to the laboratory or aseptic disposal of container.
- Also available with Bacterial barrier filter at suction end.
- Suction tube lengths available.
- PE Glove available.

PE Glove available

Suction Connecting Tube

Item No.: GCR1028

- Made of high density and PVC material.
- With Superior draping quality while maintaining.
- During suctioning, each end has universal female connectors for convenient and secure attachment.
- Most sizes have straight male connector included.
- Different type of connector are available.

Size: 3/16"x1.8M, 3/16"x3M, 1/4"x1.8M, 1/4"x3M etc.

Yankauer Handle

- Open tip and bulb tip are available.
- Vented and non-vented are available.

YANKAUER HANDLE

Ref. No.:	Description:
GCR102829	YanKauer, non-vented, bulb tip
GCR102830	YanKauer, vented, bulb tip
GCR102831	YanKauer, non-vented, open tip
GCR102832	YanKauer, vented, open tip
GCR102847	Suction Handle, vented, open tip
GCR102852	Suction Handle, non-vented, open tip

Suction Set

(Poole Abdominal Drain)

SUCTION SET

Ref. No.:	Size:	Tube:
GCR102890	24Fr	1.8m

Fixation Clip

- For endotracheal tube or suction catheter.

FIXATION CLIP

Ref. No.:	Size:
GCR102901	4.0-4.5
GCR102902	5.0-5.5
GCR102903	6.0-6.5
GCR102904	7.0-7.5
GCR102905	8.0-8.5
GCR102906	9.0-9.5

Fixation Clip

Ref. No.: GCR102907

- For endotracheal tube or suction catheter.

Tracheostomy Tube Holder

Ref. No.: GCR102908

Size: 430x25mm

- Insert the narrow tabs through flanges on trach plate.
- Secure the narrow tabs over flanges to be adhere to the neckband.
- Adhere fastener tab of short section to the long neckband section.
- Adjust the excess material to be cut for proper length.

Oral Endotracheal Tube Fastener

Type A

- Fits various sizes of endotracheal tube, from ID 5.5 to ID 8.5.
- Top screw to fix the tube.
- Convenient Velcro strap for tightening.
- Fully padded to back for patient comfort.

Type B

- Fits various sizes of endotracheal tube, from ID 5.5 to ID 10.0.
- Accommodates laryngeal mask full range from size 1 to size 5 as well.
- Side screw to fix the tube.
- The guide piece for quick access.
- Convenient Velcro strap for tightening.
- Allows for in-use suctioning of the oropharynx.
- Fully padded to back for patient comfort.

ORAL ENDOTRACHEAL TUBE FASTENER

Ref. No.:	Type:	Color:	Hold ETT:	Hold Tube:
GCR102907	Type A	Green	Size 5.5 ~ 8.5	-
GCR102909	Type B	Blue	Size 5.5 ~ 10.0	Outer Diameter (OD) 5.5 ~ 22 mm

Intubating Stylet

- Made of malleable aluminum covered with plastic sheath used for intubation assistance.

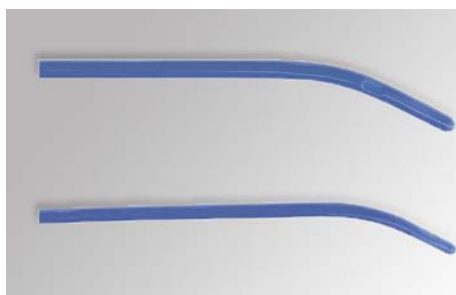

INTUBATING STYLET

Ref. No.:	Size:	Applicable ETT:	Length (mm):
GCR103001	6FR	<3.5	302

Manual Resuscitator

The Silicone resuscitator is intended for pulmonary resuscitation for neonates through to adult.

Features:

- It is semi-transparent and come with a pressure limitation valve for patient safety.
- A textured surface ensuring a firm grip and providing effective ventilation. Patient connector is 22/15mm.
- 100% latex free.

Accessories:

Silicone mask, oxygen tubing, reservoir bag.

MANUAL RESUSCITATOR

CPAP Masks (Full Face Type)

Features:

- Non-invasive Positive Pressure Ventilation Mask.
- Made of medical grade PC and liquid silicone.
- Standard connecting port, adjustable forehead pad.
- Double silicone flap provides good air-tightness and comfortable feel.

CPAP MASKS (FULL FACE TYPE)

Ref. No.:	Size:	Qty/Cs:
GCR104901	S	20

CPAP Masks (Nasal Type)

Features:

- Non-invasive Positive Pressure Ventilation Mask.
- Made of medical grade PC and liquid silicone.
- Standard connecting port.
- Double silicone flap provides good air-tightness and comfortable feel.
- Suitable for homecare, easy for patient to talk and eat.

CPAP MASKS (NASAL TYPE)

Ref. No.:	Size:	Qty/Cs:
GCR104902	M	20

CPAP Masks

Features:

CPAP is used clinically for the treatment of sleep apnea syndrome (SAS) and related diseases.

Product Description:

- Double port mask.
- Disposable type: Cannot be disinfected under high temperature.
- With inflatable valve, it can be inflated according to requirements.
- Specifications: Three different sizes to choose from.
- The head strap is designed for masks and provides secure fixation.
- The headband is made of latex-free material to reduce skin irritation and the material meets ISO-10993 requirements for biocompatibility.

Specifications:

- Material: PC cover, PVC air cushion.
- Double port diameter: 22 mm ID, 33 mm OD.

Tracheobronchial Tube

- Use for one-lung ventilation, in the OPS of bronchus, thoracic surgery and so on.
- Made of medical grade PVC, transparent, soft, and smooth.
- Available with left-sided and right-sided.
- Different side of tubes distinguished by two different cuff.
- Equipped with two suction catheters, one stylet and one switch connector.
- Easily operate one-lung ventilation by switch connector.

TRACHEOBRONCHIAL TUBE

Endobronchial Blocker Tube

Endobronchial Blocker Tube is designed to differentially intubate a patient's bronchus in order to isolate the left or right lung for procedures that require one-lung ventilation.

- Size 5fr, 7fr, 9fr meeting clinical needs, for all patients from pediatric to adult.
- Ultrathin cuff is made from PU in medical grade, thickness 0.028mm, comfortable and soft. It creates a superior seal and reduces microaspiration, when deflated it is very close to blocker tube, so it can pass ETT easily.
- Twist lock design, easy operation, secure locking.

Anesthesia Circuit Kit

The Anesthesia Circuit Kit is used with anesthesia machines and ventilators to establish an artificial airway. It includes a 2-meter expandable tube, a 22 mm bacterial / viral filter, a 3-liter latex-free reservoir bag with adapter, a size #5 anesthesia mask, and a 3-meter CO₂ sampling line.

- The reservoir bag is made of latex-free material, minimizing the risk of allergic reactions, especially important for sensitive patients.
- The kit contains all essential components for an anesthesia breathing circuit, saving time in preparation and reducing the need to source individual components.
- Expandable breathing tubes (2 meters) are lightweight, kink-resistant, and easy to adjust, offering more flexibility during surgeries and patient positioning.
- The included size #5 anesthesia mask is designed to fit adult patients comfortably and securely, with a soft cushion for better sealing and patient comfort.

ANESTHESIA CIRCUIT KIT

Ref. No.:	Contents:
GCR103472	2m expandable tube. 22mm bacterial / viral filter. 3L latex-free reservoir bag with adapter. Size #5 anesthesia mask. 3m CO ₂ sampling line.

Duo Limbo Circuits

The breathing circuit is used in combination with anesthesia machine, respiratory machine or humidifier to establish a respiratory conduit for patients. It is used in combination with anesthesia machine, respiratory machine or humidifier to establish a respiratory conduit for patients.

- Light weight, good bending resistance.
- Separate air intake and air outlet in the same pipe to reduce storage volume.
- Standard ISO interface.

DUO LIMBO CIRCUITS

Ref. No.:	Specification:
GCR103473	1.5 m Duo Limbo Circuit
GCR103451	1.8 m Duo Limbo Circuit

Coaxial Circuits

The Coaxial Circuit is designed with an inner inspiratory limb and an outer expiratory limb integrated into a single lightweight tube. This coaxial configuration minimizes circuit clutter, reduces drag on the patient interface, and helps conserve heat and humidity by utilizing exhaled gas to pre-warm incoming fresh gas. It is ideal for anesthesia, intensive care, and patient transport, offering ease of handling, space efficiency, and secure connections to reduce the risk of misconnections.

- Good compliance and air tightness.
- With built-in gas sampling line to save pipe space.
- Reduce the distortion of the patient end.
- The coaxial inner and outer tubes have a small pressure loss.
- The outer breathing tube can heat the gas in the inlet passage of the inner tube.

COAXIAL CIRCUITS

Ref. No.:	Specification:
GCR103475	1.5 m Coaxial Circuit
GCR103474	1.8 m Coaxial Circuit

Adult Anesthesia Circuits (Extendible)

Adult Anesthesia Circuits (Extendible) are designed to deliver medical gases between an anesthesia machine and a patient while providing flexibility and ease of use in various clinical environments. The extendible corrugated tubing allows for adjustable length.

- Lightweight, save storage space.
- Low airflow resistance, good compliance.
- High compression rate, adjustable length.
- Can be sold as kit with anesthesia mask, breathing bag, HMEF, catheter mount, extra limb.
- Standard Latex free breathing bags, Latex optional.
- ISO standard interface.

ADULT ANESTHESIA CIRCUITS
(EXTENDIBLE)

Ref. No.:	Specification:
GCR103478	1.2 m
GCR103477	1.5 m
GCR103437	1.8 m
GCR103476	2.0 m

Pediatric Anesthesia Circuits (Extendible)

Pediatric Anesthesia Circuits (Extendible) are designed to deliver medical gases between an anesthesia machine and a patient while providing flexibility and ease of use in various clinical environments. The extendible corrugated tubing allows for adjustable length.

- Lightweight, save storage space.
- Low airflow resistance, good compliance.
- High compression rate, adjustable length.
- Can be sold as kit with anesthesia mask, breathing bag, HMEF, catheter mount, extra limb.
- Standard Latex free breathing bags, Latex optional.
- ISO standard interface.

PEDIATRIC ANESTHESIA
CIRCUITS (EXTENDIBLE)

Ref. No.:	Specification:
GCR103479	1.2 m
GCR103480	1.5 m
GCR103481	1.8 m

Adult Anesthesia Circuits (Smoothbore)

Adult Anesthesia Circuits (Smoothbore) are designed to deliver medical gases and anesthetic agents between the anesthesia machine and the patient. The smoothbore tubing ensures lower flow resistance and easy gas flow.

- Smooth inner wall, water is not easy to accumulate, improve safety.
- Unique spiral tube body design to prevent occlusion due to twisting.
- Can be sold as kit with anesthesia mask, breathing bag, HMEF, catheter mount, extra limb.
- Standard Latex free breathing bags, Latex optional.
- ISO standard interface.

ADULT ANESTHESIA
CIRCUITS (SMOOTHBORE)

Ref. No.:	Specification:
GCR103482	1.2 m
GCR103483	1.5 m
GCR103484	1.8 m

Greatcare Catheter Clamp

The Greatcare Catheter Clamp is an exceptional medical device designed for the secure and efficient management of catheters, including Foley catheters, and other medical devices in various medical applications. This versatile clamp can also be used as a universal clamp for suitable medical and technical tubes, as well as a reliable bag closure clamp. It is the ideal choice for medical product distributors.

- Greatcare Catheter Clamp features a proprietary grip technology that ensures a secure hold on catheters, even in challenging medical scenarios.
- Designed with healthcare professionals in mind, the clamp is easy to apply and remove, minimizing patient discomfort and procedure interruption.
- Crafted from high-quality, long-lasting plastic, our Catheter Clamp ensures reliability and longevity in medical settings.
- For distributors looking to build their brand, we offer customizable branding options, allowing you to put your own label on our high-quality product.
- Any other color will be available.

GREATCARE CATHETER CLAMP

Double J Ureteral Stent Set

- Radiopaque line through out catheter facilitating the catheter location.
- Efficient drainage and irrigation.
- Good biocompatibility reducing mucosa stimulating infection.
- Set design provides necessary accessories, easy and convenient operation.
- **Contents:** double J ureteral stent, pusher, clamp,
- PTFE Guidewire, hydrophilic Guidewire is available.

Straight Urethral Dilator

- Used for dilation of the urethral strictures and vesical neck contractures.
- Smooth surface for effortless dilator advancement across tight strictures.
- Made of polyethylene.
- Smooth surface for less trauma and easy advancement.
- Tapered tip facilitating easy introduction.
- Good radiopacity for easy visualization.
- Hydrophilic is available.

Silicone Self-Adhering Male External Catheter

- All silicone, eliminates the risk of latex-related skin irritation.
- Clearance, allows easy inspection of skin.
- Odor free, no latex odor.
- Soft and breathable silicone promote more healthy skin and greater patient comfortable.
- Built-in adhesive band is part of the catheter sheath and allows for ease of application while providing improved patient confidence and longer wear time.
- Five diameter sizes to provide superior patient comfort, proper fit and greater reliability.
- Standard, short, wide three types are available.

Hydrophilic Foley Catheter

Rubber valve: Item No. GCU2021
Plastic valve: Item No. GCU2022

- Hydrophilic foley catheter wake the patients have no pain in urethral catheterization.
- The Hydrophilic coat keeps stable and is not easy to exfoliate for a long time.
- Do not need paraffin oil lubricant, which can minimize irritation to urethra.
- No urinary sediment: to avoid sediment of calcium phosphate caused by indwelling urethral catheterization.
- Good biocompatibility: do not cause urethra infection.
- Convenient operation: easy to pass through the urethral stricture or scar, and no need to dilate urethra.
- High security: especially useful to patients suffering from prostate hyperplasia or urethral stricture.
- **Type:** Two way, three way, rubber valve, plastic valve are available.
- **Size:** 10-26Fr/Ch.
- **Balloon capacity:** 5ml or 5-10ml or 5-15ml or 30ml or 30-50ml are available.

Hydrophilic Nelaton Catheter

- Designed for short term bladder catheterization.
- Color coded connector for easy identification of size.
- For single use only.

Urine Bag

Ref. No.: GCU201902

- 2000ml, with GCU-P029 sample port, with T valve.
- Extra outer diameter tubing (OD: $9 \pm 0.03\text{mm}$).
- Extra thickness film, both side film transparent.
- Four holes for different distance of hang sizes.

Urine Bag

Ref. No.: GCU202001

- 2000ml, with needleless sample port & T valve.
- Extra thickness film, one film is transparent, another film is white.
- Elasticity & extra outer diameter tubing.
- Extra thickness film, both side film transparent.
- Four holes for different distance of hang sizes.

Urinary Drain Bag

Ref. No.: GCU210201

- 2000ml
- Front film is transparent, back film is white.
- T-valve, Twist valve, pull-push valve, single reversal valve are available.
- Four types of sample port, (GCU-P029, P031, P032, P042 are available, for detail, please refer to page 128 – 129).
- With anti-reflux valve.
- Latex-free. Packed sterile.

Urinary Drain Bag

Ref. No.: GCU210301

- 2000ml
- Front film is transparent, back film is white.
- T-valve, Twist valve, pull-push valve, single reversal valve are available.
- Four types of sample port, (GCU-P029, P031, P032, P042 are available, for detail, please refer to page 128 – 129).
- With anti-reflux valve.
- Latex-free. Packed sterile.
- With plastic tie.

Urinary Drain Bag

Ref. No.: GCU210614

- 2000ml, with T valve, with needleless sample port.
- Front film is transparent, and back film is white.
- With anti-reflux valve, with reinforced double hanger.

Urinary Drain Bag

- With anti-reflux device (three parts), with needle or needleless sample port.
- With bed sheet clamp.
- With reinforced double hanger and rope hanger, with T valve.
- Latex-free. Packed sterile.
- Four different types of sample port are available.

URINARY DRAIN BAG

Urinary Drain Bag

Ref.No.: GCU210617

- 2000ml, tubing outlet with T valve.
- Front film is transparent, back film is white.
- With plastic holder, rope hanger.
- Latex-free. Pack sterile.

Urinary Drain Bag

- With anti-reflux device (one part).
- With needleless or needle sample port.
- With bed sheet clamp.
- With reinforced double hanger and rope hanger.
- With T valve.
- Latex-free. Packed sterile.

URINARY DRAIN BAG

Ref. No.:	Capacity:	Qty/Cs:
GCU210801	2600ml	40
GCU210802	2500ml	40
GCU210803	2000ml	40
GCU210806	4000ml	20

Urinary Drain Bag

- With anti-reflux device, with sample port.
- With reinforced single hanger.
- Latex-free. Packed sterile.
- Four different types of sample port are available.

URINARY DRAIN BAG

Ref. No.:	Capacity:	Descriptions:	Qty/Cs:
GCU210901	2000ML	With finger guard clamp	40
GCU210902	2000ML	With T valve	40

Urinary Drain Bag

Ref. No.: GCU211009

- 2000ml
- With anti-reflux device (two parts), with needleless sample port.
- With bed sheet clamp. Tubing clip is optional.
- Elastic Tubing, with reinforced plastic hang tape.
- With T valve. Latex-free. Packed sterile. Blister pack or poly bag packing.

Urinary Drain Bag

Ref. No.: GCU230138

U8 2000ml

- With anti-reflux tower (three parts), with needleless sample port.
- With bed sheet clamp.
- With reinforced double hanger and rope hanger.
- With T valve.
- Latex-free. Packed sterile.

Urinary Drain Bag

Ref. No.: GCU230139

U05 2000ml

- With anti-reflux tower (one part), with needleless sample port.
- With kink resistant PVC tubing.
- With bed sheet clamp.
- With reinforced double hanger and rope hanger.
- With T valve.
- Latex-free. Packed sterile.

Foley Catheterization Tray

Ref. No.: GCU240401

These sterile kits are ideal for self-catheterization training or for use when urine disposal facilities are unavailable. They incorporate all the necessary components into a single, user-friendly system.

Component:

- 1 Foley Catheter, 14Fr.
- 1 Urine cup, 4oz.
- 1 Urinary Drainage Bag with Anti-reflux Drip Chamber.
- 1 Patient Label.
- 1 Blister tray.
- 1 Pre-filled 10ml Syringe of Sterile Water.
- 1 Sponge forceps.
- 5 Cotton balls.
- 1 Paper box.
- 1 Vinyl Powder-free Gloves; M.
- GSR toilet paper: 65x56cm.
- 1 Waterproof drape, 45x42cm.
- Mouth paper: 45x42cm.

Urine Meter Drain Bag

- Easy-to-read molded plastic meter is calibrated up to 200ml .
- With needleless sample port.
- With reinforced double hanger and rope hanger.
- Latex-free. Packed sterile.

URINE METER DRAIN BAG

Ref. No.:	Description:	Qty/Cs:
GCU220101	2600ml drain bag and 200ml urine meter	10
GCU220102	2500ml drain bag and 200ml urine meter	10

Urine Meter Drain Bag

- Easy-to-read molded plastic meters is calibrated up to 400ml, 500ml urine meter.
- With anti-reflux device.
- With needleless sample port.
- With reinforced double hanger and rope hanger.
- Latex-free. Packed sterile.

URINE METER DRAIN BAG

Ref. No.:	Description:	Qty/Cs:
GCU220108	2600ml drain bag and 500ml urine meter	10
GCU220109	2600ml drain bag and 400ml urine meter (with big reinforced double hanger)	10

Urine Meter Drain Bag (three chambers)

- Easy-to-read molded plastic meter is calibrated up to 400ml urine meter.
- With anti-reflux device.
- With needleless sample port.
- With reinforced double hanger and rope hanger.
- Latex-free. Packed sterile.

URINE METER DRAIN BAG (THREE CHAMBERS)

Ref. No.:	Description:	Qty/Cs:
GCU220201	2600ml drain bag and 400ml urine meter	10
GCU220202	2500ml drain bag and 400ml urine meter	10

Urine Meter Drain Bag (double chambers)

- Easy-to-read molded plastic meter is calibrated up to 400ml urine meter .
- With needleless sample port, Middle type cross valve.
- With reinforced double hanger and rope hanger.
- Latex-free. Packed sterile.

URINE METER DRAIN BAG (DOUBLE CHAMBERS)

Ref. No.:	Description:	Qty/Cs:
GCU220203	2600ml drain bag and 400ml urine meter	10

Urine Meter Drain Bag (three chambers up-down type)

Ref. No.: GCU220348

2000+500ml with single reversal valve, with needleless sample port, bed sheet clamp, tubing clip, reinforced double hanger & tie.

Urine Meter Drain Bag

Ref. No.: GCU220349

2500ml with T valve, with needleless sample port, bed sheet clamp, tubing clip, reinforced double hanger.

Leg Bag

- Front and back are PVC films.
- With twist valve, with double high elastic belts.

LEG BAG

Ref. No.:	Description:	Qty/Cs:
GCU230101	500ml, ellipse shape	50

Leg Bag

- Front and back are PVC films.
- With twist valve, with double high elastic belts.

LEG BAG

Ref. No.:	Description:	Qty/Cs:
GCU230104	800ml, square shape	50
GCU230106	1000ml, ellipse shape	50

Urology (GCU) 126

Leg Bag

- Front and back are PVC films.
- With twist valve, with double high elastic belts.

LEG BAG

Ref. No.:	Description:	Qty/Cs:
GCU230108	600ml, square shape	50

Leg Bag

- Front and back are PVC films.
- With twist valve, with double high elastic belts.

LEG BAG

Ref. No.:	Description:	Qty/Cs:
GCU230110	900ml, square shape	50

127 Urology (GCU)

Leg Bag

L40 750ml

- With anti-reflux valve.
- PVC films coated with one-ply flocking material.
- With T valve.
- Latex-free. Packed sterile.

LEG BAG

Ref. No.:	Description:	Tubing Length:
GCU230140	needleless sample port	10cm
GCU230144	needleless sample port	30cm
GCU230146	needleless sample port	50cm

Leg Bag

L50 1000ml

- With anti-reflux tower (three parts).
- PVC films coated with one-ply flocking material.
- With rope hanger.
- Latex-free. Packed sterile.

LEG BAG

Ref. No.:	Description:	Tubing Length:
GCU230150	needleless sample port	30cm
GCU230151	needleless sample port	60cm
GCU230152	needleless sample port	90cm

Leg Bag

- With T valve.
- The length of tubing: 7cm, 10cm, 30cm, 50cm, 65cm available.
- PVC films coated one-ply non-woven material or flocking material.
- Available in fixed connector or flexible connector.

LEG BAG

Ref. No.:	Description:	Tubing Length:
GCU230111	500ml, fixed connector	7cm
GCU230112	500ml, fixed connector	30cm
GCU230135	500ml, flexible connector	30cm

Leg Bag

- With T valve.
- The length of tubing: 7cm, 10cm, 30cm, 50cm, 65cm available.
- PVC films coated one-ply non-woven material or flocking material.
- Available in fixed connector or flexible connector.

LEG BAG

Enteral Feeding Set (Gravity Type)

with wide-bore tubing

- Rigid neck for easy filling and handling.
- With plug cap and strong, dependable hanging ring.
- Easy-to-read graduations on a translucent bag.
- Bottom exit port allows complete drainage.
- DEHP-free option available.

ENTERAL FEEDING SET (GRAVITY TYPE)

Ref. No.:	Size:
GCD30311	1000 ml with wide-bore tubing (O.D. 6.5 mm)

Enteral Feeding Double Bag Set

Ref. No.: GCD303112

- Enteral feeding device used for gastric or intestinal nutrition, suitable for use in hospitals and home care.
- Components include a 1000 ml nutrition bag, secondary flushing bag, drainage tubing, flow regulator, and patient connection interface.
- Dual-bag design allows simultaneous preparation of nutrition solution and flushing solution, improving efficiency and patient convenience.
- Made of latex-free materials to ensure patient safety.

Enteral Feeding Set (without bag)

- For enteral nutrition delivery in hospitals or home care.
- Medical-grade PVC, DEHP-free optional.
- With or without Y-injection site for flushing / extra nutrition.
- Kink-resistant tubing; universal or Greatcare connector optional.
- Latex-free, sterile, single use.

ENTERAL FEEDING SET
(WITHOUT BAG)

Ref. No.:	Y Injection Site:
GCD30315	Without
GCD30325	With

Enteral Feeding Container

- Rigid plastic container for enteral feeding use.
- Clear graduations for accurate volume measurement.
- With strong hanging ring for reliable support.
- Available with or without integrated feeding set.
- Reusable if undamaged and properly cleaned.
- Latex-free, DEHP-free optional.

ENTERAL FEEDING CONTAINER

Ref. No.:	Description:	Qty/Cs:
GCD30314	Container with feeding set	50
GCD30308	Container	50
GCD30309	Feeding set	200

Greatcare Feeding Set- Pump Type

Ref. No.: GCD30316

- Pump feeding set.
- PVC tube, 1.8 m standard length (other lengths available on request).
- Roller clamp and drip chamber.
- Patient-end Greatcare female connector with cap, ISO 80369-3 compliant.
- Optional: gravity version; Y-connector with cap; stepped transition adapter for legacy interfaces; patient label.
- Feed cap adaptor for connection to nutrition bottles / bags.

Greatcare Cross Spike (Optional)

Enteral Feeding Set for Bottle / Bag-Gravity Type

Ref. No.: GCD303289

- Gravity feeding set with PVC frosted elastic tubing.
- Bottle cap adaptor for easy connection to nutrition bottles or bags.
- Drip chamber and roller clamp for accurate flow control.
- Universal connector; Greatcare connector optional (ISO 80369-3 compliant).
- Optional Y-connector (Y-site) for flushing.
- Latex-free; DEHP-free optional.
- Individually sterile packed.

Enteral Gravity Feeding Bag

Ref. No.: GCD303132

- 1500 ml capacity with clear graduations in 100 ml increments.
- Large top filling port with secure leak-proof cap for easy refilling.
- Greatcare-compatible purple connector for standardized, safe enteral nutrition delivery.
- Writable bag surface for patient identification (optional).
- Strong hanging ring for reliable suspension on infusion stands.
- Integrated Robert clamp for quick and secure flow stop.
- Optional outer sleeve for placing ice or warm water packs to regulate solution temperature.
- Available in economical PVC or premium EVA material.
- Latex-free; DEHP-free optional.
- EO sterile, single use, recommended duration up to 24 hours.

Weighted Nasojejunal Feeding Tube with Greatcare Connector

- Sterile, single-use weighted nasojejunal feeding tube for enteral nutrition.
- Distal end contains stainless steel beads to facilitate passage into the jejunum.
- Made of medical-grade PU, DEHP-free optional.
- Smooth, rounded tip with two lateral eyes for effective feeding and patient comfort.
- Patient-end Greatcare female connector with cap, ISO 80369-3 compliant.
- Available sizes: 8, 10, 12, 14, 16, 18Fr.

WEIGHTED NASOJEJUNAL FEEDING TUBE WITH GREATCARE CONNECTOR

Wound Drainage Reservoir-Three Springs

Spring-activated closed wound suction device. Transparent bellows reservoir with volume markings, designed for effective post-surgical drainage.

Features:

- Available in 200ml and 400ml volumes (800ml optional).
- Needle sizes from Fr8–Fr22 (depending on model).
- Bellows reservoir with secure connectors.
- Connecting tube with clamp and Y-connector.
- Perforated Redon drain catheter included.
- Sterile, non-toxic, single use.

Wound Drainage System- Hollow Type

Closed-wound suction device with 400ml hollow bellows reservoir. Transparent chamber with volume markings for easy monitoring.

Features:

- Capacity: 400ml.
- Needle sizes: Fr8–Fr18.
- Hollow bellows reservoir with three-way connector.
- Supplied with perforated Redon catheter, drainage tubes, and clamp.
- Blue plastic strap for hanging or fixation.
- Sterile, single use.

Digestive (GCD) 160

Silicone Wound Drainage Reservoir

Item No.: GCD3050

- Silicone wound drainage reservoir is a disposable silicone portable device used for closed wound suction.
- The reservoir kits are supplied sterile and are for single patient use, clear reservoir.
- Sidewalls and volume calibrations facilitate examination and measurement of the drainage.
- Flat tube, fluted tube or round tube is optional.

Capacity: 100ML, 200ML, 400ML.

Needle size: 7Fr, 10Fr, 12Fr, 14Fr, 15Fr, 18Fr, 20Fr, 22Fr, 24Fr.

Drainage Reservoir-High Pressure

Item No.: GCD3051

High-pressure wound drainage system with transparent reservoir and secure tubing.

- Capacity: 200ML, 400ML, 600ML, 800ML.
- Needle size: Fr8, Fr10, Fr12, Fr14, Fr16, Fr18, Fr20, Fr22.

161 Digestive (GCD)

Drainage Reservoir-High Pressure

Ref. No.: GCD3051

High-pressure wound drainage system with transparent reservoir and secure tubing.

Features:

- Capacity: 200ml, 400ml, 600ml, 800ml.
- Needle sizes: Fr8-Fr22.
- Designed for efficient suction under higher pressure conditions.
- Sterile, single-use.

Spring-Vac Drainage Reservoir

Item No.: GCD3052

- Capacity: 150ml, 200ml, 300ml, 400ml, 450ml.
- Needle sizes: Fr8-Fr22.
- Portable closed-wound suction system with spring-vacuum technology.
- Clear bag with graduation for drainage monitoring.
- Supplied sterile, single-use.

Drainage Bag A

- Used for collecting blood and body fluids during medical procedure in operating rooms and clinical departments.
- Before use, confirm that the protective cap of the Injection Hole is tightly closed, and disinfectant and SAP can be added.

DRAINAGE BAG A

Ref. No.:	Description:	Capacity:
GCD305388	With check valve, injection port	2000ml

Drainage Bag B

- Used for collecting blood and body fluids during medical procedure in operating rooms and clinical departments.
- Before use, confirm that the protective cap of the Injection Hole is tightly closed, and disinfectant and SAP can be added.

DRAINAGE BAG B

Ref. No.:	Description:	Capacity:
GCD305389	With check valve	2000ml

Rectal Tube

Item No.: GCD306

- Designed for enema administration or rectal fluid / stool drainage.
- Proximal end with universal funnel connector for safe attachment to a collection / drainage bag.
- Made of soft, non-toxic PVC, available with or without X-ray opaque line.
- Atraumatic rounded tip with two lateral eyes for efficient drainage.
- Color-coded connector for easy size identification.

Size: 6-36 Fr/Ch.

Length: 200 mm or 400 mm.

Cleansing Enema Set

Ref. No.: GCD30702 1500ml

- For rectal cleansing before examination of the rectum or sigmoid colon.
- **Components:**
 - 1500ml bag with 60" tubing and pre-lubricated tip.
 - Soap packet.
 - Waterproof drape (42x42cm).
 - With or without gloves.

Irrigation Set

Ref. No.: GCD30703 1500ml

- Designed for patient comfort and convenient irrigation.
- Available sizes: 1500ml, 1750ml, 2000ml.
- Equipped with roller clamp and Robert clamp.
- Latex-free, sterile, single use.

Irrigation Set

Ref. No.: GCD30709

- Used for bowel cleansing by introducing warm water or cleaning solution.
- Includes container, balloon pump, and irrigation tubing with tip.
- Balloon allows repeated air expulsion and easy liquid infusion.
- For rectal cleansing under medical guidance; frequency of use depends on doctor's advice.
- Latex-free, reusable after proper cleaning.

Fecal Collection Bag (Drainage Bag C)

Ref. No.: GCD30708

- Designed for safe collection of liquid stool to prevent leakage and protect perianal skin.
- Integrated gel solidifier reduces odor, improves hygiene, and protects caregivers and family members.
- Helps lower the risk of infection from pathogenic microorganisms in feces.
- Suitable for ICU and long-term bedridden patients; recommended indwelling time ≤ 29 days.
- Latex-free, sterile, single use.

Colostomy Bag

Ref. No.: GCD30801 / GCD30802

- Secure, odor-proof and leak-proof film.
- Cut-to-fit adhesive baseplate, max cut: 30-60 mm.
- Closed-end pouch, single use.
- Optional: opaque (off-white) or transparent pouch for patient preference.
- Skin-friendly adhesive, soft material for comfort.

Size Options:

- GCD30801: 14x20 cm, closed
- GCD30802: 15x25 cm, closed

GCD30801

GCD30802

Colostomy Bag-Closed Type

Ref. No.: GCD30803

- Odor-proof, leak-proof closed colostomy bag.
- Cut-to-fit adhesive baseplate, max cut: 30-60 mm.
- Designed for single use and hygienic disposal.
- Size: 14x25 cm, closed end.

Feeding Set for Enteral Feeding Container (Greatcare optional)

Ref. No.: GCD30309

- Gravity feeding set dedicated to our Enteral Feeding Container; includes a container adapter with short soft link for secure coupling.
- PVC tubing length customizable, drip chamber, ergonomic roller clamp.
- Patient-end connector: standard funnel with cap (default); Greatcare connector optional.
- Latex-free; DEHP-free optional; EO sterile, single use.

Short soft link

Container adapter

Enteral Feeding Spike Set with Comfort Regulator (Greatcare)

Ref. No.: GCD303290

- Gravity feeding spike set with Greatcare connector.
- Wide comfort regulator for easy flow adjustment, especially for elderly or weak patients.
- Drip chamber, PVC tubing length customizable.
- Greatcare female connector.
- Greatcare three-way stopcock for flushing / med administration.
- Latex-free; DEHP-free optional; EO sterile, single use.

Comfort regulator

Greatcare Enteral Syringe

- For enteral feeding or irrigation use.
- Clear graduation markings in mL.
- Latex-Free, DEHP-Free, BPA-Free.
- Each syringe supplied with cap in individual blister pack.
- Greatcare connector, ISO 80369-3 compliant, reduces risk of misconnections.

GREATCARE ENTERAL SYRINGE

Ref. No.:	Size:
GCD303153	5ml

Greatcare Spike

Ref. No.: GCD303201

- Non-vented Greatcare cross spike with protective cap.
- Fits 4.1 mm OD enteral tubing.
- Color-coded purple for enteral use.
- EO sterile, single use.

Transition Adapter-Legacy Luer to Greatcare

Ref. No.: GCD303202

- Female Greatcare connector (ISO 80369-3 compliant) ↔ Female Luer-Lock (legacy).
- Serves as a temporary bridge during transition from legacy devices to Greatcare.
- For transitional use only; remove after use to minimize misconnections.
- Purple housing, EO sterile, single use.

Greatcare Y-Port

Ref. No.: GCD303203

- Greatcare male connector, compliant with ISO 80369-3 standard.
- Y-connector with Greatcare male side port and tethered cap.
- Fits 4.1 mm OD tubing.
- Allows medication or flush administration without disconnecting the feeding set.

Greatcare Male Lock with Strap

Ref. No.: GCD303205

- Greatcare male connector, compliant with ISO 80369-3 standard.
- With tethered cap for hygienic closure.
- Fits 4.1 mm OD tubing.
- Provides secure connection to Greatcare feeding devices and accessories.

Greatcare Female Connector with Strap

Ref. No.: GCD303204

- Greatcare female connector, compliant with ISO 80369-3 standard.
- With tethered cap for hygienic closure.
- Fits 4.1 mm OD tubing.
- Provides a secure transition point for Greatcare connections.

A.V. Fistula Needle

The fistula needle mainly composes of needle tube, hub, catheter, female luer connector, clamp, sheath and protect cap. The product is intended to puncture the mature fistula, and connect with the bloodlines to establish blood circulating path outside human body in the process of hemodialysis.

- Fine polishing process on blade to puncture easily and smoothly.
- Siliconized needle reduces pain and blood coagulation.
- Back eye and ultra thin-walled ensures a high blood flow rate.
- Rotatable wing and fixed wing are available.

A.V. FISTULA NEEDLE

Arterial Cannula

Arterial cannulation is an essential procedure for continuous arterial pressure monitoring and repeated blood gas sampling, widely used in perioperative and critical care settings.

Features:

- Designed for safe and reliable arterial access.
- Enables continuous real-time blood pressure monitoring.
- Allows repeated arterial blood gas sampling.
- Supports arterial waveform analysis for diagnostic purposes.
- Withstand high pressure up to 300 PSI.
- Indwelling time up to 72 hours.

Nasal Splint

The nasal splint is designed to support the septum after septoplasty or rhinoplasty, minimizing adhesions between the septum and lateral nasal wall while maintaining airway patency.

Features:

- Airway channel design allows nasal breathing postoperatively.
- Funnel-shaped airway increases airflow efficiency.
- Preformed holes enable secure fixation by suturing.
- Can be trimmed to fit patient anatomy.
- Made of soft, medical-grade silicone for comfort and atraumatic insertion.
